Who We Are

Access and Content Limited is a Fiber Internet Service Provider that delivers superior Internet connectivity services to government agencies, corporations, and businesses across Nigeria.

Our Mission

To deliver reliable, high-speed Internet for businesses to increase productivity and surpass their goals.

Our Services

We provide premium data connectivity plans for upscale corporate businesses that need a dedicated internet connection to ensure efficient operations.

Why Choose Us?

We stay on top of our game, and we want to use our resources to help you stay on top of yours. We've done the work, now all you have to do is take advantage of it.

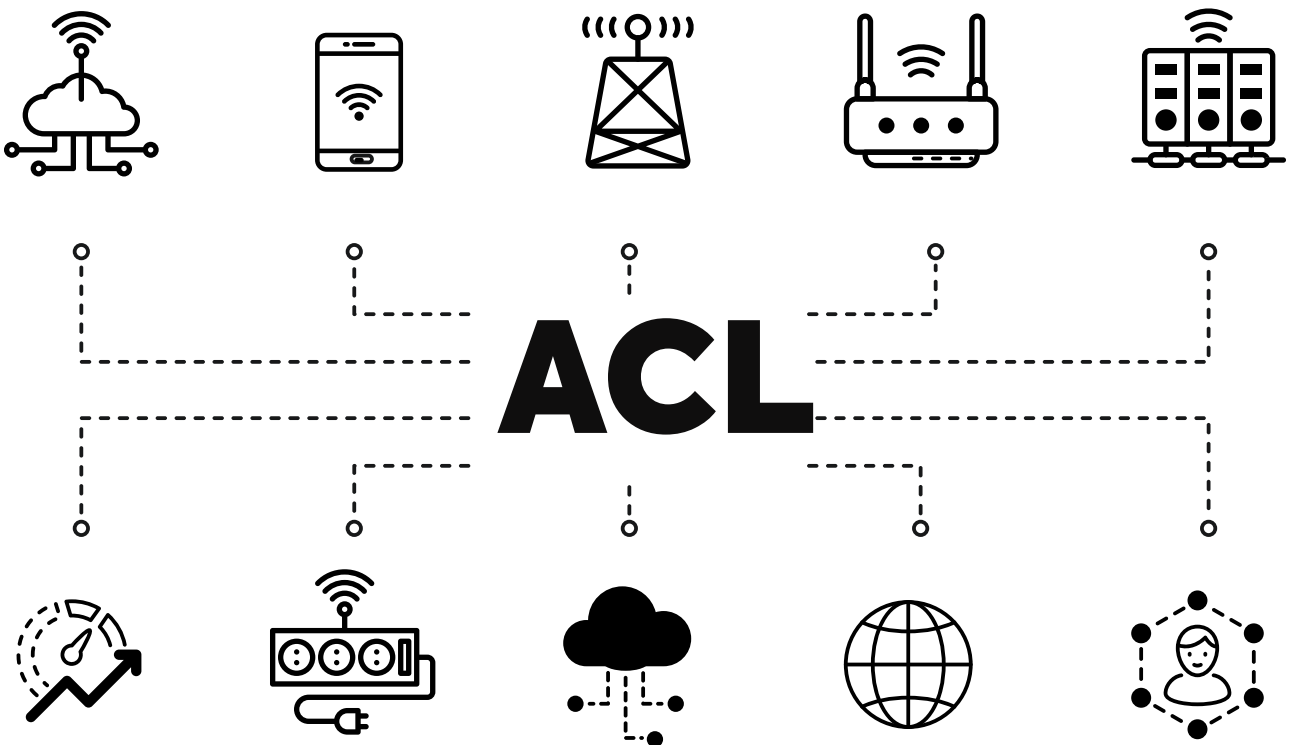

Contact

We would love to hear from you. Please do not hesitate to get in touch with us.

Who We Are

We started as a non-profit project geared towards providing affordable Internet connection to African Higher Education Institutions and corporate entities. We have so far provided quality high-speed Internet to over **36 African universities and organizations**. Our satellite resources have helped us provide better Internet services for **organizations across Ghana, Tanzania, and Nigeria** to leverage with the global community.

Our years of experience yielded progressive results and afforded us technical knowledge of Internet infrastructure that we have now built upon to deliver reliable Internet.

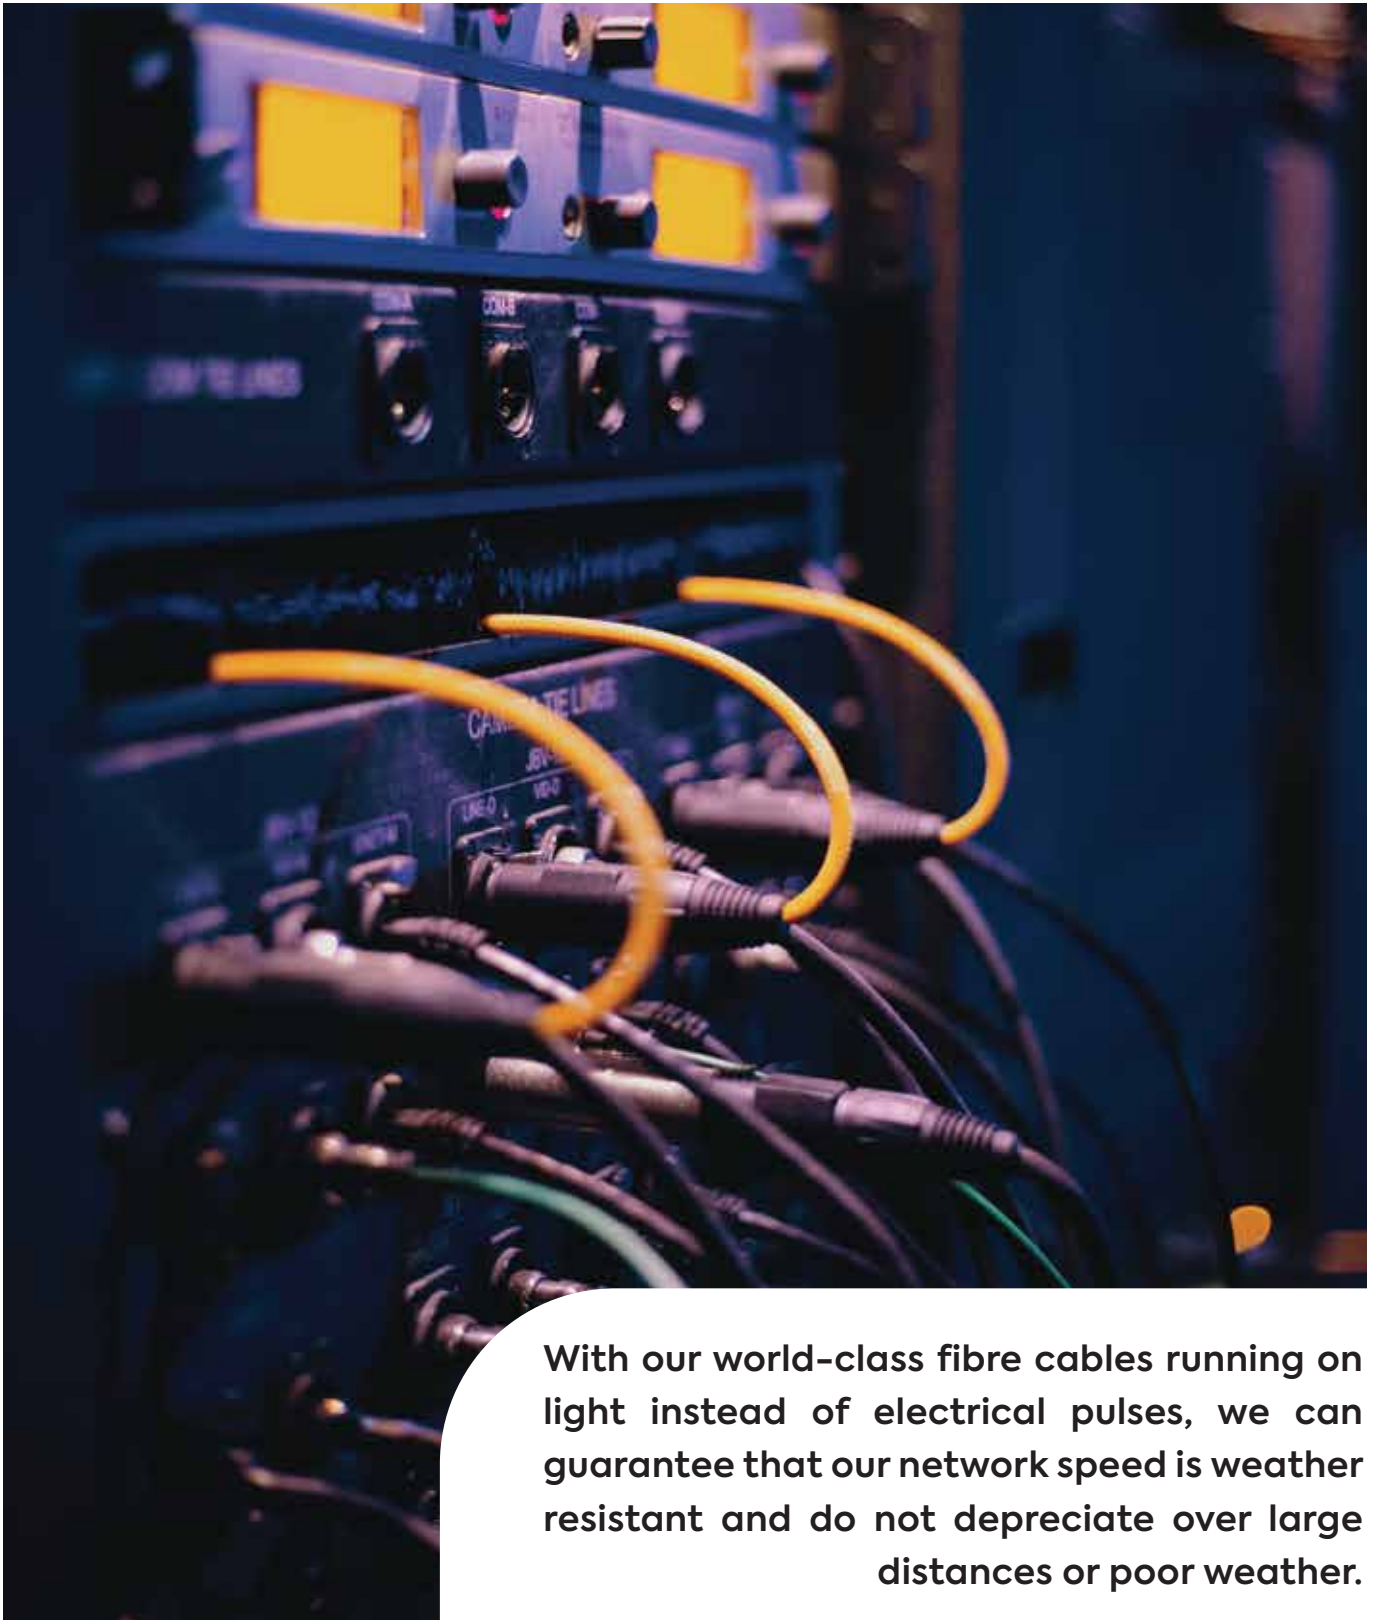

Our years of experience yielded progressive results and afforded us technical knowledge of Internet infrastructure that we have now built upon to deliver reliable Internet.

Our Mission

To deliver reliable and affordable high-speed Internet.

With our world-class fibre cables running on light instead of electrical pulses, we can guarantee that our network speed is weather resistant and do not depreciate over large distances or poor weather.

Our Services

Enterprise Services

We provide premium data connectivity plans for upscale corporate businesses that need a dedicated Internet connection to ensure efficient operations. Our upstream connections leverage multiple subsea cables to Europe through multiple terrestrial fibre optic cables.

These links have alternative terrestrial routes to ensure that connectivity is not lost in cases of fibre cuts. Our links are also configured to have more than the total customer-subscribed bandwidth capacity, so there is never any congestion on our network regardless of time or distance.

Fibre to the Business (FTTB)

Access Internet Fibre to the building service provides you with dedicated, high-speed and low latency Internet access delivered directly to the customer's premises using reliable and easily scalable last-mile fibre connectivity.

All our Business Fibre connections are supported by an established, superior national and international backbone with full redundancy.

Why Choose Us

We are generally able to provide better technical support than the average network operator.

We provide superior Internet Engineering and regional peering

Solutions Made Just For You

Our Broadband services are customized to meet the specific connection needs of your organization. We provide bandwidth capacity that meets the requirements of your highest data-consuming tasks.

Accessible Technical Support

Our highly-trained technical team are always available to ensure that all technical issues are swiftly resolved with minimal stress on your part. We are proactive with network management and our customers are duly notified ahead of maintenance routines that could affect their connection.

Advanced Monitoring

Our automated network monitoring helps us to ensure that you get the value for your money, and our team works in synergy with in-house network administrators to view Internet bandwidth consumption and take appropriate action when necessary.

Long-Term Infrastructure

We keep upgrading to better the quality of our service and to deliver broadband speed that not only meets your current needs but also helps you easily adapt to the demands of emerging technology.

Stay Informed

Getting ahead in today's world is closely tied to how quickly you can process and act upon new information, and we provide the framework to ensure that you stay up-to-date at the instant click of a button.

Uninterrupted Entertainment

Our low-latency connection makes it easy to enjoy your favourite games without lag. You can stream your favourite shows on Netflix, Hulu, YouTube, and more without having to wait for them to buffer. Dive right into the fun whenever you have to.

Save money

Our pricing plans are optimized to grow with your business. The more bandwidth you buy, the cheaper the per Mbps rate. You get more speed to get work done faster for a lot less money.

Lightning-fast Internet Speed

Upload and download files in a jiffy. Stream video content without glitches. Experience upload speeds like never before. Send files to your friends and colleagues with ease. Skype your family with crystal clear images and sound.

Private IP Address Allocation

We give you a range of static IP addresses for easy access to your web servers, email servers and other Internet servers.
